4. About three quarters of the barracks buildings at the airfield were lighted at 5 p.m. on 7 December. The cantonment west of the field and what was presumed to be an ammunition dump on the southern edge of the field were again illuminated by lights on poles. No light was on in the AA gun emplacement.
5. About 50 single-engine, low-wing monoplanes with in-line engines were parked in front of the hangars on 10 December. There was no flying. The T-shaped antenna on the radio truck west of the field pointed in a different direction than previously, namely SW-NE. The four masts were still missing on the other radio installation. (5) No changes were observed in the AA gun emplacement or the installations of the field.

25X1

Comments.

- (1) The number of aircraft of two types, IL-10s and PL-2s or TU-2s, indicate that the occupation of the Schoenwalde airfield has not changed. One ground attack regiment and one squadron of an air reconnaissance regiment, equipped with PL-2s and TU-2s, are believed to be in Schoenwalde.
- (2)
- (3)
- (4)
- (5) The removal of the antenna masts was previously reported.
